Season's Greetings

With thanks, too

As the year comes to a close, I would like to take this opportunity to thank all of you for your loyalty over the past year. I speak for everyone in our practice in telling you how much we appreciate each and every one of you.

We enjoy your visits and sharing your news about family events and activities. It's important to me and to the staff that you enjoy those visits to our office too. Your oral health is our first priority and we are committed to providing a comfortable and friendly atmosphere so that you, our patients, enjoy a relaxed, positive experience.

As the busy holiday season approaches, I would like to extend sincere wishes from all of us for happy celebrations with your family.

Happy holidays,

Dr. Jim Chen

*Season's
Greetings*

from our
family to
yours!

Thank you for all your referrals. We appreciate them!

Something To Chew On

The real skinny

Eating low-cal fruits can help lower your calorie intake, reduce your risk of some chronic diseases like stroke, heart disease, and diabetes, and may protect against certain cancers, including oral cancer.

Besides providing vital nutrients, each fruit has its own unique qualities. Scientists believe that grapefruit, for example, contains a substance that's a natural fat-fighter. And no wonder the pear is so popular: this low-cal member of the rose family is a good source of fiber, vitamins B2, C, and E, copper, and potassium!

Here are five fruit-friendly tips...

Add fruit to hot or cold cereal.

Top frozen yogurt with fresh fruit or compote.

Keep fruit visible – you'll eat more of it.

Add fruit to salads and main-course meals.

Request a complimentary whole-fruit program at your place of work.

Strategies From H To O

You can do it!

It's tough to judge your impact on the environment. Take global warming. In one study, participants ranked an eight-minute shower "low" on a list of activities that generate greenhouse gases. The reality? Heating shower water produces more CO₂ than a new compact car or a major appliance run for the same time!

A timer on your shower would help – and save water too! Here are some more conservation tips for you:

- **Turn** the tap off while brushing your teeth.
- **Chill** water in the fridge instead of running the tap.
- **Collect** rainwater for your garden.
- **Wash** your car with a sponge and bucket instead of a hose.

Our practice is committed to reduce, re-use, and recycle.

What's Precious To You?

Tell the world... every day!

What you choose to place a high value on says quite a bit about you. For example, if you treasure your health and well-being and that of your family, that tells the world that quality of life really matters to you. An improved quality of life brings each of us a greater sense of self-confidence and mastery of our environment. And nothing says self-confidence and mastery like a healthy and beautiful smile.

Here are some smile flaws we're often asked about. Many of the popular solutions we've suggested take only one or two visits without surgery and without anesthetic.

- **Chipped or cracked teeth?** Tooth-like materials can be bonded to your enamel so no one will ever notice.
- **Discolored teeth?** Supervised professional whitening can brighten your teeth. Versatile bonding and veneers can camouflage and whiten.
- **Gaps in your teeth?** Bonding or porcelain veneers can reduce unwanted spaces without braces.
- **Crooked, crowded, or protruding teeth? Teeth with very wide gaps?** Orthodontics can bring them back in line – in no time.
- **Worn-down teeth and ageing restorations?** Beautiful natural-looking inlays and onlays, crowns, bonding, and veneers can whiten, re-contour, strengthen, and restore symmetry to your smiling face!

Some things are too precious not to value. Your beautiful smile is proof that you have chosen to become the best that you can be!

What Do You Expect?

Get the most out of life - and keep it!

You have so much to look forward to. An environment to save, career and fitness challenges to meet, and the pleasure of mentoring people you care about personally and professionally. Still, you might be surprised by some of the things that can slow you down and take the joy away - like letting a little bit of gum disease develop into a serious problem. Gums? Serious? Definitely.

About The Mouth-Body Link - Science has linked gum disease with these disorders, among others: cardiovascular diseases, respiratory diseases, cancers, diabetes, and arthritis.

About Progressive Discomfort - Although it begins with no symptoms, what's virtually inevitable is bad breath, swollen tender gums, and gums that bleed when you brush or floss ... eventually progressing to gums that pull away from the teeth, exposed roots, and loose or drifting teeth... And well, you can guess how comfy that is!

About Appearance - Swollen red gums and exposed tooth roots aren't appealing, plus bone loss due to gum disease can alter your bite, change the fit of restorations, and make you look older than you are.

Please don't postpone your regular visits. We can help you to prevent, arrest, and sometimes reverse gum disease. We can also show you how to brush and floss more effectively, including under the gumline and beneath your restorations, to remove the bacterial film that is gum disease's root cause.

...And you can look forward to living your life to the fullest!

Secure & Versatile

Smile with dental implants

Nobody wants to lose teeth, but let's face it - it can happen to anyone. Maybe even you? Thanks to dental implants though, you can avoid further damage that would otherwise add insult to injury, like the inevitable shifting and tilting of surrounding teeth and the loss of bone in the jaw that can create a sunken prematurely aged appearance.

As if safeguarding your oral health and appearance weren't astonishing enough...

- 1** Implants require only normal brushing and flossing - no special home-care routines.
- 2** There is no need to remove healthy enamel from surrounding teeth to accommodate implants.
- 3** There is no metal visible above your gumline.
- 4** Implants can be used for a single tooth replacement or as part of a major makeover.

Ask us about astounding, amazing, adaptable implants!

Don't Fall Behind!

Use your benefits

We know that by now, you understand that any advice we give to you is out of genuine concern for your well-being. Whether we recommend a treatment plan, suggest a lifestyle change, or encourage you to use up your annual insurance benefits, our sole motive is to help you achieve optimal oral health.

As we get further into the year, time starts to run out for you to make the most of your insurance before it expires on December 31st. We will start to remind you more often as the days pass, but only because we don't want you to lose valuable benefits which won't carry over to next year.

Please take a moment to check your remaining insurance benefits ... then book an appointment to make the most of them!

Now Is The Right Time

To make referrals

Making and keeping a dental appointment, especially at this time of year, is very important and makes complete sense. Competitive sports are ramping up and to play it safe, mouthguards are a requirement. People also want to look their best for the holidays, or are realizing that they need work done before this year's dental benefits expire.

No worries! We have appointments available and we ask you to ensure your regular checkups are on track, and if not, invite you to schedule one.

Also, please refer your friends, colleagues, and family members to us. When you refer, it's an excellent reminder to others that preventive care is a top priority. We hope you know how much we value your referrals - they are high praise, and for that we are grateful to you!

Your Opinion Matters

Share it with us

The decisions we make regarding our team, this newsletter, and the services offered at our practice are based on one thing – you. We carefully weigh our options and choose what we feel would provide a more comfortable, more efficient, and better overall dental experience for you.

Because we can't know how you feel about these decisions unless you tell us, we invite you to share your feedback on every aspect of our practice. That's the way we'll know for sure that our efforts are working to create a pleasant atmosphere and patient-friendly services.

So please speak up and let us know if there's something you'd like to learn about in this newsletter or if you'd like to share your thoughts about your overall experience at our practice. We always welcome your comments.
